FURNACE CHAIN LUBRICANTS

3R3600

Description

This oven chain lubricant, easy to apply, is made of 25% fine graphite powder and a volatile liquid support. The liquid evaporates without any smoke nor residue, leaving a soft film of graphite that coats all moving parts. It is odorless and can be used as is, no need to dilute. The 3R3600 can be brushed or sprayed on chains.

Applications

This material can be used for all friction surfaces, even in areas of difficult access and where the contacts are narrow. It reduces the frictional resistance and does not accumulate hardened deposits.

Specifications

Physical properties

Graphite Content	25%
Carrier	Odorless petroleum distillate
Particle Size	13 microns
Consistency	Fluid
Flashpoint	80°C (176°F)
