TUBES

3R912

Description

The advantage of using this red line gauge glass is that it allows ease of reading, and, even if it is placed in a location where the water column is not easy to view. The red line gives a special effect which makes the liquid level stand out clearly. It is available in lengths of 8" to 72".

Applications

The 3R912 is mostly used in tanks, reservoirs and low pressure boilers.
