

ADHESIVES

THERMIC 1100

Description

The high temperature Thermic 1100 glue consists of different inorganic materials. It resists to 2012°F.

Applications

The product is most suitable to stick insulating material to surfaces like steel, glass, enamel or comparable others. Because of the increased pH value steel will not corrode. However, on aluminium, slight corrosion is possible.

Specifications

Technical Data

Density	1500 kg/m ³
Temperature	1100°C
Drying time at 20°C	8 hours
Odor	Odorless
Drying time	2-3h (completely hardened after 24h)

Storage condition	12 months shelf life. Store in original packaging, vertical, between 5C and 30C and out of direct sunlight
